EDUCATION

COMSATS University Islamabad – Attock Campus

Attock, Punjab, Pakistan

Bachelor of Science in Software Engineering

Sep 2023 – Expected Jun 2027

- Currently in 6th Semester
- Relevant Coursework:** Database Systems, Web Development, Object-Oriented Programming, Data Structures & Algorithms, Mobile Application Development

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C++ (Basic)

Web Technologies: HTML5, CSS3, JavaScript

Developer Tools: Git, GitHub, VS Code, XAMPP, Microsoft Visual Studio

Databases: MySQL (via XAMPP/PHP)

Soft Skills: Problem Solving, Critical Thinking, Team Collaboration

PROJECTS

CEO Dashboard | *HTML5, CSS3, JavaScript, PHP, MySQL, XAMPP*

2024

- Developed a fully responsive CEO Dashboard web application for business analytics and data visualization, improving data accessibility for decision makers.
- Engineered interactive UI components using HTML, CSS, and JavaScript to deliver a real-time user experience with charts, KPI cards, and dynamic navigation.
- Configured and integrated XAMPP environment for PHP/MySQL backend handling, enabling local server setup and database-driven content rendering.
- Designed structured dashboard layouts with data representation features including charts and filterable tables for enhanced readability.

Python Calculator Application | *Python*

2023

- Developed a functional command-line calculator application in Python supporting arithmetic operations including addition, subtraction, multiplication, and division.
- Implemented robust input validation and error handling to ensure crash-free execution and a smooth user experience.
- Applied core programming principles to strengthen algorithmic thinking and foundational problem-solving skills.

Smart Legal Assistant & Marketplace App | *React Native / Flutter, Node.js, AI APIs*

In Progress – FYP

- Designing and developing an AI-powered mobile application to provide legal guidance and a marketplace for legal services, targeting real-world accessibility challenges.
- Architecting features including an AI chat-based legal assistant, user authentication, and a service listing marketplace platform.
- Planning integration of AI APIs for intelligent query handling with a scalable Node.js or Python backend to support mobile front-end.

LANGUAGES

Urdu: Native | **Pashto:** Native | **English:** Intermediate

ACHIEVEMENTS & ACTIVITIES

Final Year Project (FYP): Leading development of a Smart Legal Assistant & Marketplace App – an AI-powered mobile solution for legal accessibility.

Academic Projects: Independently designed and built a CEO Business Dashboard and Python Calculator demonstrating practical software development skills.

Problem Solving: Regularly practices algorithmic thinking and logic building through course-related coding exercises and personal projects.
